

Everyone benefits from listening to XM Satellite Radio and its traffic and weather channels. I purchased XM radio specifically because I can get information and programs that are not available through any other source or reception. Satellite radio provides variety and quality that are not available elsewhere. We pay for these services and it should not be up to the National Association of Broadcasters to dictate what we are permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that we demand and deserve.
